

99-R-93

1. The City Council directs that the Energy Commission develop an energy policy for the City of Evanston with a specific priority to examine all available sources of electricity, their relative cost, achievability, efficacy and benefit to the City of Evanston.
2. The Energy Commission shall report to the City Council every four months in regard to their progress and situation with a final recommendation including all supporting documents by May, 1995, and this matter shall stay on the agenda of the Administration and Public Works Committee.
3. Following the final report, there will be seven months of community education, discussion and debate with consideration given to a referendum on this issue.
4. The goal for the final decision would be December, 1995.
5. The City Manager is directed to organize staff to support this effort and together with the Energy Commission to develop a Time and Task Plan to achieve this goal and to submit the Plan to City Council by January 25, 1994.

Adopted: September 24, 1993

Lorraine H. Norton
Mayor

Attest: Kristen Davis
City Clerk
